DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by US patent number 6,404,896 (Yoo et al).

Regarding claim 1, Yoo et al discloses a speaker assembly (figures 2-6) having a vibrating element and magnetic loops comprising a frame (22), wherein the frame is provided with a vibrating element (31) at a center portion thereof; and characteristics thereof being: the vibrating element has at least two sound coils (36,37), with each sound coil joined with a connecting wire (54,55); and at least two driving assemblies (61,63) having two corresponding round magnetic loops at one side thereof, with the magnetic loops accommodated at end portions of the sound loops, thereby forming a speaker assembly.

Regarding claim 2, Yoo et al also shows wherein the two sets of corresponding sound coils and magnetic loops are joined and formed as oval in shape (see figure 3a).
